**VISION**™

## Website Accessibility Training and Consultation

In today's digital world, accessibility compliance reaches far beyond physical modifications to buildings and curbs. Ensuring customers who have visual disabilities, difficulty reading and problems browsing with a mouse can fully access local government websites is vital to providing accessible services to the community.

While implementing a compliant CMS is an important step, local governments who want to provide the highest level of accessibility online must also know how to create and maintain compliant content.

To empower you, Vision offers three tiers of services, following best practices and using leading compliance validation tools.

| Service | Basic | Standard | Plus |
|---|---|---|---|
| Design consulting to WCAG 2.0 standards | X | X | X |
| Test website to WCAG 2.0 standards using automated tool | X | X | X |
| Train content editors in WCAG 2.0 standards via webinar | | X | X |
| Develop WCAG accessibility statement | | X | X |
| Reformat top 25 pages to be accessible | | X | X |
| Reformat top 250 pages to be accessible | | | X |
| Train content editors in WCAG 2.0 standards via on-site class | | | X |
| Manually test top five tasks of new website for accessibility and provide report for different disabilities (vision-impaired, hearing-impaired, difficulty using a mouse) | | | X |
