Better Citizen Experiences With Digital Services & Forms

Your citizens expect digital services. Unfortunately, finding specific services or forms on a local government website is often a challenge. Most are buried several layers within the site or even spread across many sites.

With visionLive™ Transact, go fully digital with forms and services seamlessly integrated with your government CMS for greater citizen experiences, efficiency and savings.

Offer Citizens a Digital One-Stop-Shop

Transform any webpage into a digital service portal, providing citizens with an easy way to navigate to all the services and forms offered by your agency in just a few clicks. Our service portal can be customized for a homepage or interior page to fulfill any use case imaginable.

Easily Build Paperless Forms

Leverage Vision's growing template library as a starting point for 100s of the most common forms used in local government. Anyone can easily customize a template or start from scratch using a familiar interface and drag-and-drop functionality.
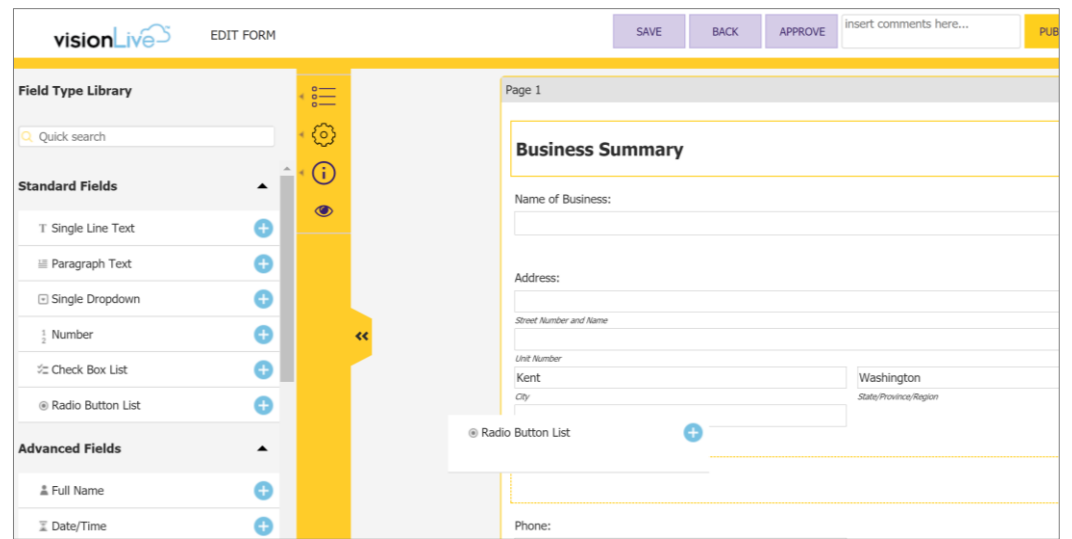

Easily build mobile friendly and accessible webforms and surveys with our drag-and-drop interface and 40+ form field elements.
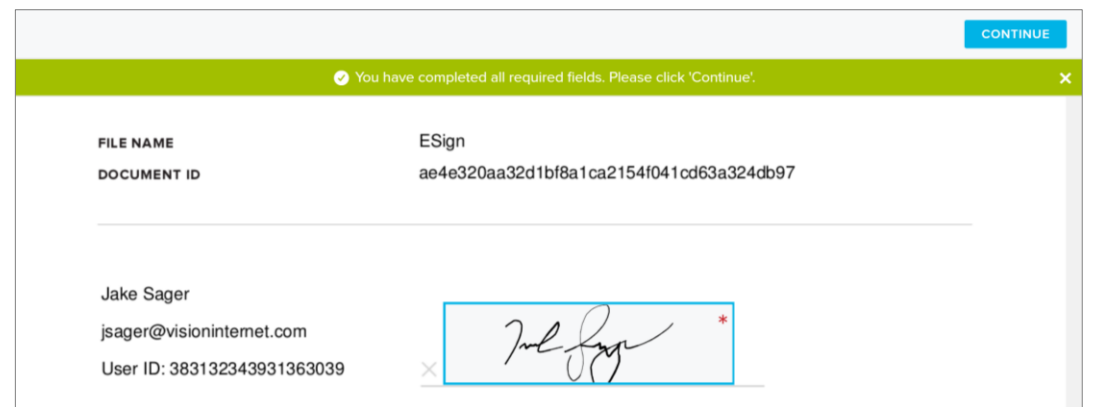

Add a legally binding digital signature to any form. Signatures are validated by a third party and include a secure audit trail backed by guarantee.

Go Fully Digital with a Complete Solution

Complete approvals, applications and transactions faster by building an end-to-end digital web form with electronic signatures and payment requests. Plus, automatically route responses through your chain of command.
