# PROGRAMMING & CONTENT MIGRATION PHASE

GOAL:
The goal is to complete the programming of the new prototype website and deliver the site, hosted on a development server, with all pages selected in the Content Preparation Phase migrated.

VISION DELIVERABLES:
1) Content migration of all pages marked for migration in the Sitemap
2) Prototype website on development server

CLIENT DELIVERABLES:
1) If not hosting with Vision, send remote desktop access information to Vision to verify client's hosting environment meets the requirements and to transfer the new website.

KEYS FOR SUCCESS:
Vision PM may reach out to clarify functionality or content of website during programming/migration phase; your specificity and prompt response will ensure the website meets your expectations on deadline.

Development Phase Begin

Vision Hosted

No

Vision to verify client's hosting environment meets the new requirements via Remote Access
