

Social Media Management, Simplified

With visionSocial, you can streamline your social media activities by managing them directly from the CMS. Post what you want, when you want and where you want it.

- Schedule posts to maximize visibility
- Customize messages to increase engagement
- Plan multiple posts across multiple channels to build campaigns

visioninternet.com/visionSocial

Now, you can create an event or news item and all of your social media posts at the same time.

The diagram illustrates the workflow of visionSocial. On the left, a CMS interface shows an event titled "Little League Parade" with details: "Join us for the annual parade", "Date: 04/15/2016", and "Location: 123 Main Street, Citytown, California 90245". A "Share & Bookmark" button is visible. A Facebook icon with a dashed arrow points from the CMS to a Facebook post. The Facebook post is from "My City" (published by www.mycity.com) on Mar 29, with the text "Mark your calendars for our 52nd annual Little League Parade - Saturday April 15th at 9am" and a photo of baseball players. A Twitter icon with a dashed arrow points from the CMS to a Twitter post. The Twitter post is from "My City" (@MyCityUSA) on Mar 29, with the text "Mark your calendars now to save April 15th for the Little League Parade" and a link "goo.gl/...". Another Twitter post is shown below it, dated Apr 14, with the text "The Little League Parade is tomorrow - we hope to see you there!" and a link "goo.gl/g3/wcc". To the right of the Facebook post, a "My City Police Department" post is shown, dated Apr 8, with the text "The traffic downtown is going to be crazy tomorrow - avoid the City Hall area unless you're attending the Little League Parade!". Below that, another "My City" post is shown, dated Apr 14, with the text "Only 1 more day until the Little League Parade - we hope to see you there!" and a photo of children in baseball uniforms.
