

## Secure hosting with all the bells and whistles

visionLive™ subscribers enjoy comprehensive hosting services designed to ensure optimal website performance, protection and security.

[visioninternet.com/hosting](http://visioninternet.com/hosting)

### Robust Hosting

#### Physical

- Certified data center SSAE
- 16 Type II compliant
- Security access via ID, biometrics, CCTV and keycard
- Redundant ISP providers
- Firewall protection

#### Power

- Power failure equipment including battery backup
- Redundant generator backup

#### Monitoring & Backup

- 24 hour monitoring
- Daily onsite/offsite data backups
- 99.9% guaranteed uptime

### Disaster Recovery

In the event of any outage impacting our primary data center, your website visitors will be able to access your website as usual via our backup data center.

#### Backup data center

- Geographically separate from our primary data center
- SSAE 16 Type II compliant

#### Standard for All Subscribers:

- Site restored in 90 minutes or less
- Data replication every 15 minutes
- Recurring monthly failover testing

#### Premium Option:

- “Hot” standby site running at backup data center at all times
- Site restored in 5 minutes or less
- Automatic failover and fallback

### DDoS Mitigation

Distributed Denial of Service (DDoS) attack protection is standard for all subscribers and detects malicious traffic within seconds:

- State-of-the-art technology capable of mitigating the world's largest and most complex attacks
- Global terabit-scale network has over 1 Tbps of active capacity
- Smart detection technology uses dual methods to accurately diagnose and mitigate attacks:
  - Signature-based identifies the source
  - Heuristics-based analyzes the behavior
