New Dashboard Improves Productivity and Access to Help

visionLive's new administrative Dashboard is the result of months of research and gathering feedback from users. While the core system functionality and menus remain the same, the Dashboard incorporates new features to simplify the process of creating content, managing content and accessing help and support, making it easier for all users to be more productive.

Core **Menu Options** and **Functionality** are still accessible through the drop-down menu

Content Shortcuts descriptions to improve usability

Shortcuts and Blocks can be added or removed to customize your view

New **Dashboard Blocks** to easily create new items, manage existing items and learn more about the feature

Context-specific **Help** to assist you on every page
