More About Park City

World-renowned as a skiers' paradise, Olympic venue and home of the Sundance Film Festival, Park City boasts many natural and cultural attractions. When considering their redesign, Park City wanted to showcase their community's year-round beauty and modernize their design. The streamlined format allows the majestic beauty of the city's scenery to speak for itself, while making it easy to find important information.

“Redesigning our website was a massive project, but working with Vision made it significantly easier than anticipated and enjoyable. The project manager was great to work with and kept things very organized. Their customer service is exceptional and they make great efforts to resolve issues quickly.”

Shannon Dale,
IT Coordinator II
