More About Janesville

Janesville is known as "Wisconsin's Park Place". Its 2,590-acre (10.5 km²) park system includes 64 improved parks, as well as boat launches, golf courses, and nature trails. When redesigning their site, Janesville was looking for a more modern design that still felt homey and emphasized the city's natural charms. The new site feels both current and friendly, while showcasing images from the city's bountiful parks.

"Vision helped take the City of Janesville's ideas from concept to reality by providing exceptional customer service and project management. Governmental entities have an obligation to be transparent by providing access to great quantities of data. Vision assisted the City of Janesville in presenting the information citizens desire in an intuitive and visually appealing manner."
